## PREFACE

The Directorate of Agriculture & Food Production brings out its annual flagship publication “Odisha Agriculture Statistics” every year. Though it has been delayed in publishing the “Odisha Agriculture Statistics- 2017-18” but utmost care has been taken to make this publication an errorless booklet which will be widely used as a trusted source of information on various aspects of Agriculture and allied sectors, including crop production and productivity, minimum support price, Agro-climatic zones of Odisha, Credit & Insurance, Price Support Scheme.

Agriculture Statistics is of utmost importance in this segment of information compilation and analysis as the information provided relates to major livelihood of the state and are widely discussed both in government and public forums. The Directorate of Agriculture & Food Production, Odisha collects these information through its own field functionaries and corroborates the information from other collateral sources such as Directorate of Economics & Statistics, Directorate of Horticulture, Registrar Co-operative Societies, India Meteorological Department, etc. The information so collected are compiled and published in the form of “Odisha Agriculture Statistics”. I firmly believe that, this booklet will be of immense use among the planners, policy makers, researchers, students, organizations and individuals involved in development of agrarian sectors of the State.

Besides containing routine information on agriculture scenario of Odisha, “Odisha Agriculture Statistics 2017-18” contains information on productivity and production of major crops in the neighboring states as well as all India level. Sincere attempts have been made to ensure correctness of data and improve upon earlier publications by incorporating more analytical data. Any error found is unintentional and clerical. We look forward to have feedback & suggestions for further improvements. For wider accessibility, a soft copy of the publication has also been uploaded in our website: [www.agriodisha.nic.in](http://www.agriodisha.nic.in).

The officials of this Directorate, both in field and at headquarters, have worked sincerely and toiled hard for meticulous compilation of data and publication of “Odisha Agriculture Statistics-2017-18” and their efforts are therefore really praiseworthy. The information provided by various organizations are duly acknowledged and we hope their continued support and guidance in future, too.

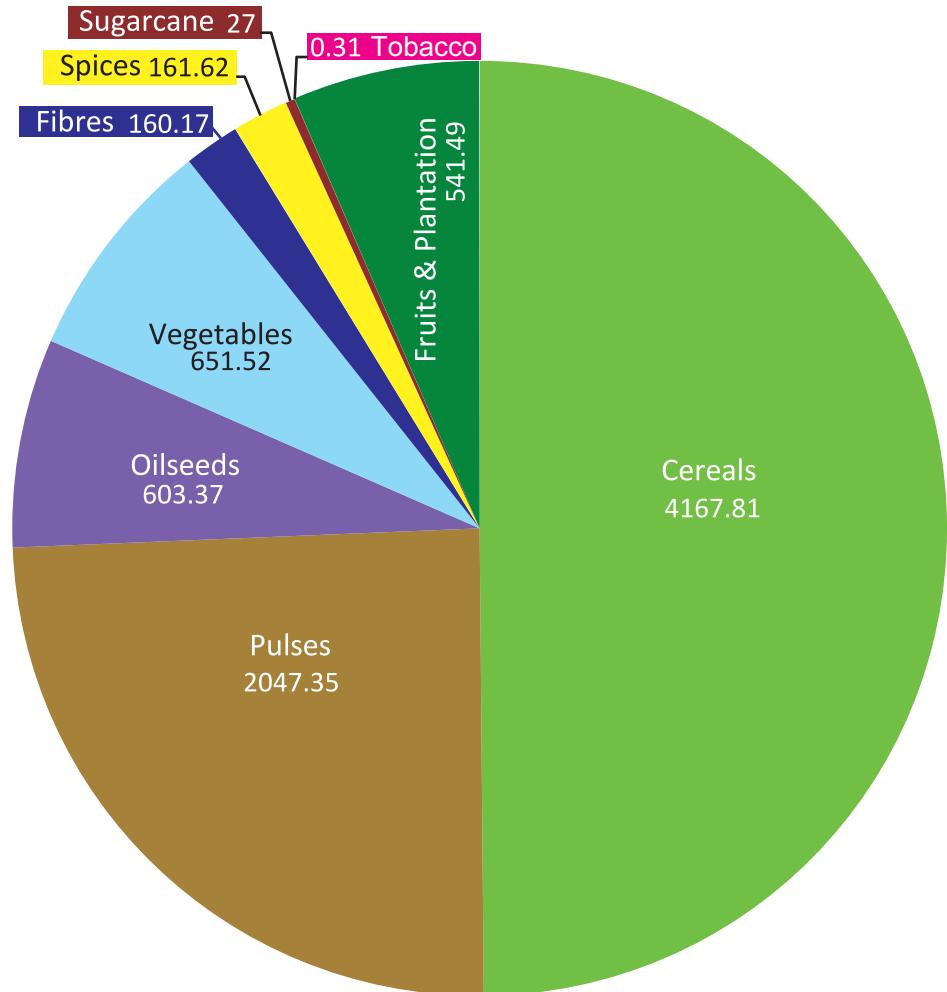

I sincerely hope that this edition will be appreciated for its rich content and up-to-date coverage of data on the agriculture and allied sectors.

(M. MUTHUKUMAR)

# **ODISHA AGRICULTURE STATISTICS 2017-18**

## **INTRODUCTION**

Agriculture and allied sector is the backbone of the Indian economy so as of our state Odisha. Near about 60% people earn their livelihood through Agriculture and allied activities. Growth of this sector is badly necessary for ensuring food security as well as the overall socio-economic growth of the farming community of our state.

Odisha has a geographical area of 1,55,707 sq.Kms. and is divided into ten agro climatic zones depending upon various parameters like soil types, topography, rainfall and cropping pattern. The total cultivated land of the State is 61.80 lakh ha out of which 29.14 lakh ha (47%) is High land, 17.55 lakh ha (28%) Medium land and 15.11 lakh ha (25%) low land and about 65% of cultivated land in Kharif season is irrigated. Majority of the farmers are small and marginal and have limited access to resources. Literacy too is a concern for this vulnerable group of farming community. As per Agricultural Census-2015-16 the number of operational holdings of the State is 48.66 lakh with an operational area of 46.19 lakh ha. The State witnessed a decline in operational area from 48.52 lakh ha in 2011-12 to 46.19 lakh ha in 2015-16 due to urbanization and more of land put to non-agricultural use. Accordingly, the average size of land holding for all social groups in the State too has declined to 0.95 ha.

This “**ODISHA AGRICULTURE STATISTICS 2017-18**” contains information mainly related to Land Utilization Statistics, the Estimation of Area, Yield and Production of different crops like Cereals, Pulses, Oilseeds, Fiber Crops, Vegetables, Spices & Condiments and other useful information relating to agriculture like Rainfall, Temperature and Humidity, Irrigation, Use of agro-inputs like seeds, fertilizers, pesticides, Farm Mechanization, Crop Loan, Crop Insurance and also incorporate information on Seed Replacement Ratio (SRR), Minimum Support Price (MSP), Departmental farms, Soil Testing etc.

The information furnished in this booklet with regards to area, yield rate and production of Paddy crop has been obtained from the Directorate of Economics and Statistics (DE&S), Odisha, which is based on the sample surveys conducted under EARAS scheme. The estimation of other crops is made on the basis of reports received from the field functionaries of the Directorate of Agriculture & Food Production (DA&FP), Odisha and Directorate of Horticulture (DH), Odisha.

## CLIMATE & RAINFALL

The climate of the State is tropical, characterized by high temperature, high humidity, medium to high rainfall, short & mild winter. The normal rainfall is 1451.2 mm. Most of the rainfall received in the state is concentrated over a period of 3 months of the monsoon season.

During 2017, the rainfall varied from deficient to excess. The pre-monsoon rainfall (April'17 & May'17) was deficient by 40.8% and monsoon rainfall (June'17 to September'17) was again deficient by 10.1% whereas post monsoon rainfall (October'17 to December'17) was excess by 42.9 %. The detailed rainfall scenario for the year 2017 is presented below:

**Table -1**

Period	Rainfall in mm		% of Deviation
	Normal	Actual	
Summer (Jan'17 to March'17)	59.8	34.8	-41.8
Pre-monsoon (April'17 & May'17)	96.4	57.1	-40.8
June'17	216.5	208.4	-3.7
July'17	339.9	339.7	-0.1
August'17	356.0	294.0	-17.4
September'17	231.9	187.0	-19.4
<b>Sub Total (Monsoon) June'17 to September'17</b>	1144.3	1029.1	-10.1
<b>Post Monsoon (Oct.'17 to Dec.'17)</b>	150.7	215.3	42.9
<b>Grand Total</b>	1451.2	1336.3	-7.9

## CROP CONDITION

Initially the progress of the cropping season i.e. sowing/transplanting of crop was good even after a bout of flash floods in southern parts of Odisha in which 22,356 ha of crop land were affected. The cropping operation was again affected due to heavy rainfall leading to flood in 8 districts of northern & coastal Odisha in which crop damage were reported in more than 50,000 ha . The deficit rainfall during August & September further aggravated the crop condition and crop stand was very poor. The effects of deficit and erratic rainfall on Kharif crops are noted below:

- i.) Heavy weed infestation and poor plant stand of Autumn paddy.
- ii.) Late transplanting of medium and late paddy with aged seedlings.
- iii.) Intercultural operation like beushanning of direct sown paddy was affected

- iv.) Drying of grains of medium and late paddy.
- v.) Poor crop stand, reduced growth and tillering of late varieties of paddy.

Crops in 15 districts (covering 70 Blocks &, 1114 GPs+ ULBs and 6021 villages) over an area of 3.35 lakh were affected by the drought.

Towards last part of the season the major Kharif crop i.e. Paddy was again affected by unseasonal rainfall and an unprecedented pest attack (BPH attack) that substantially affected the crop production.

The condition of non-paddy and Rabi crops were by and large normal.

## CROP COVERAGE

Rice is the major crop in Kharif season, so are pulses & oilseeds in Rabi season. The net area sown and gross cropped area during the year 2017-18 were **53.56** lakh ha and **83.61** lakh ha respectively. The cropping intensity for the said period was 156%. The coverage under different crop groups during the year 2017-18 is as follows:

**Table -2** (Area in lakh ha)

## IRRIGATION

The gross irrigation potential created till 2017-18 from all sources is 59.16 lakh ha (40.47 lakh ha during Kharif and 18.69 lakh ha during Rabi) and gross irrigated area during the year was 34.15 lakh ha (22.35 lakh ha during Kharif and 11.80 lakh ha during Rabi) which is 57.7 % of the irrigation potential created. The details are presented below.

**Table - 5**

(*Area in lakh ha*)

Crops	Kharif			Rabi			Total

Total	54.28	22.35	41.2	23.91	11.8	49.4	78.19	34.15	43.7

While the total irrigated area (potential created) increased by 6.0% over previous year and the utilization of potential too improved by 4.6 %.

## CREATION OF CAPTIVE IRRIGATION

Assured supply of water is one of the pre-requisites for successful crop production. Accordingly, our State Govt. provides subsidy to the cultivators for creation of captive irrigation under the Jalanidhi scheme of State Agriculture Policy. The achievement made under the scheme during 2017-18 is as follows.

(*Unit in Nos*)

### Name of the captive irrigation under RIDF During 2016-17

## SEEDS

Use of quality seed plays a vital role in boosting the production. The strategy has been to maximize production & distribution of quality seeds. The details of seed distribution made through departmental sale centers during 2017-18 are as follows:

**Table - 6**

Sl. No.	Seeds	Quantity of seeds supplied (Qtls.)

## SEED REPLACEMENT RATE

The Seed Replacement Rate (SRR) of different crops for 2017-18 is indicated below.

**Table - 7**

Name of the crop	Seed Rate Kg./ha.	SRR in % for 2016-17		
		Kharif	Rabi	Total
Paddy	60	23.93	45.86	25.50
Ragi	10	2.71	0.49	2.66
Maize	15	19.26	4.49	18.22
Wheat	125		13.09	13.09
Moong	20	3.27	9.13	7.68

Sunflower	5		38.59	38.59
Jute	10	32.79		32.79
Cotton	2	68.96		68.96

While the SRR for paddy is almost at par with the recommended level, the same for other non-paddy crops (except Jute, Cotton, Maize) are much behind national level. The major concern in this area is poor level of SRR in pulses.

**Table - 8**

## FERTILISER

The balanced use of chemical fertilizers substantially improves the productivity and production of crops. Due importance is being given on balanced use of fertilizers in line with the Integrated Nutrient Management (INM) principles, which not only enhances production but also maintains

Type of Nutrient	Consumption in '000MT.		
	Kharif	Rabi	Total

the fertility of the soil. While there was an increase in Kharif fertilizer consumption (12.3%) the Rabi consumption declined by 28.4% due to less supply of canal water and also because of the Flash flood that inhibited farmers to go for intensive cropping. The details of fertilizer consumption made during 2017-18 are given at *Table -8*.

## PESTICIDES

Crops grown under various agro-climatic situations are affected by a large number of pests and diseases. Most often chemical control measures are being resorted to protect the crops to avoid crop losses. The details of pesticides consumption during 2017-18 are as follows:

**Table-9**

Besides adopting situation specific need based Chemical control measures, Government is also providing IPM techniques, creating awareness among farmers through Seed Treatment campaigns, collecting pest and disease details through e-pest surveillance from fields etc.

## FARM MECHANISATION

Farm mechanisation is inevitable in modern crop husbandry. This not only ensures timely agricultural operations but also helps reduce drudgery of labour & cost of cultivation. Massive efforts have been put in for popularization of different improved farm equipments and machineries among farmers through conducting demonstrations and extending subsidy. The achievement made in this regard during 2017-18 is presented at Table-10.

## POWER CONSUMPTION

The trend of power consumption for Agriculture Purpose and its share in total power consumption since 2001-02 is indicated below. There has been a consistent drop in the share of agriculture sector to total power consumed in the State. The main reason ascribed for this decline is the lack of dedicated electric feeder ensuring consistent power supply for agricultural purpose especially to mega lift points. On the contrary there has been a sharp rise in the use of power by industrial sector leading to an apparent drop in the share of power consumed by agriculture sector.

**Table - 11**

## AGRICULTURE CREDIT

During 2017-18 annual credit plan of Rs. 12000.00 Crore had been chalked out for financing Agriculture & allied sector. Against the said plan, Rs 11005.738 Crore was disbursed. The inter district variation noticed in agriculture financing ranging from 74 to 110%. Overall the state total loan disbursement was 92% of total target.

## CROP INSURANCE

This was the second year of implementation of Pradhan Mantri Fasal Bima Yojana (PMFBY). Three new crops i.e. Arhar & Maize in Kharif & Sugarcane in Rabi were included under the purview of PMFBY. Because of the focused campaign for enrolment of Non-Loanee farmers the nos moved from 30,000 in Kharif'16 to 1.5 lakh in Kharif'17. There was also increase in area insured over the previous year.

The achievement made under above crop insurance scheme (PMFBY) for the year 2017-18 is given below.

**Table - 12**

Item	Kharif	Rabi	Total
Farmers Covered (Nos in lakh)	18.244	0.618	18.862

Farmers Benefited (Nos in lakh)	7.527	0.143	7.670

## MINIMUM SUPPORT PRICE

The Minimum Support Price (MSP) of various agricultural commodities is fixed by the Commission for Agricultural Costs and Prices (CACP) Govt. of India with an objective to prevent fall in price in the event of over production and to protect the interest of farmers by ensuring them minimum support price for their products in the situations of price fall in the market. The MSP fixed for Common and Grade-A paddy during the year 2017-18 were ₹1550 and ₹1590 per quintal respectively i.e. an increase of Rs 80 for both the types of Paddy over the previous year.

## PROCUREMENT OF CROPS

In addition to Paddy & Cotton, procurement of pulses & oil seeds were taken up under Price Support Scheme and accordingly 177 MT of Sunflower seeds, 1405.880 MT of Greengram and 947.765 MT of Groundnut had been procured.

### NOTES

- The figures for India and Manipur, include by sex, the estimated population, 0-6 population and literates of Paomata, Mao Maram and Purul Sub-division of Senapati district of Manipur for Census 2001 and 2011.
- For working out density of India and the State of Jammu & Kashmir, the entire area and population of those portions of Jammu & Kashmir which are under illegal occupation of Pakistan and China have not been taken into account.
- The 1981 Census could not be held owing to disturbed conditions prevailing in Assam. Hence the population figures for 1981 of Assam have been worked out by 'Interpolation'.
- The 1991 Census was not held in Jammu & Kashmir. Hence the population figures for 1991 of Jammu & Kashmir have been worked out by 'Interpolation'.
- The names of Uttaranchal and Pondicherry have been changed to Uttarakhand and Puducherry respectively after Census-2001.

#### FOOT NOTE

##### Reasons of defunct farms

Poonang : Sand casting  
 Keshpur : Inundation of saline water from Chilika  
 Boipariguda : No irrigation available & 90% upland  
 Dumuriput : Adequate irrigation not available and 88% upland  
 \*Deras farm : 193.901ac(77.560ha) relinquished to Revenue Deptt. for establishment of IT park

##### Reasons for under utilisation

- 1 Due to lack of adequate irrigation facilities
- 2 Due to lack of fencing
- 3 Improper land levelling resulted in poor water management
- 4 Industrial effect
- 5 High land
